

Electric Yogurt Maker with Multiple Cups

This electric yogurt maker is designed for home use, allowing users to create fresh and natural yogurt. It features a transparent lid and maintains a consistent temperature for optimal fermentation.

Product Overview

Fresh, Home-Made Yogurt Made Easy

The YMX-10A yogurt maker provides an efficient and elegant solution for crafting fresh, natural yogurt at home. Featuring a unique structural design that ensures equal heat transmission, this appliance maintains the optimal temperature required for lactobacillus activation. With a 1000ml capacity and a transparent lid for process monitoring, it combines safe PTC heating technology with simple operation for a healthy, store-bought alternative.

Technical Specifications

Rated Voltage	220V-240V
Frequency	50 Hz
Power Consumption	20 W

Capacity & Design

Total Capacity

1000 ml

Capacity

Number of Cups	6
Design Features	Transparent top cover, Container lid included, Compact design, Elegant appearance

Performance & Safety

Key Benefits

- Equal heat transmission
- Maintains lactobacillus activation
- Safe constant temperature operation
- Observable fermentation state

Heating Technology	PTC constant temperature control
