

# Electrical Panel Cabinet with Transparent Cover

This surface-mounted electrical panel cabinet houses circuit breakers and other electrical components. It is made from durable plastic and has a hinged transparent cover for easy access and visual inspection.

## Product Overview

### Professional Electrical Distribution Housing

This surface-mounted electrical panel cabinet is engineered for the secure housing of circuit breakers and essential electrical components. Featuring a durable, insulated plastic construction, it offers reliable protection for indoor electrical installations. The integrated hinged transparent cover allows for immediate visual status inspection without requiring the panel to be opened, enhancing safety and maintenance efficiency in both residential and commercial environments.
