

Electrical Wire Crimper with Cutter

This press clamp is designed for electrical power transmission and distribution tasks. It features an insulated crimper for secure connections, a wire cutter for precise cuts, and a non-insulated crimper for versatile applications.

Product Overview

Professional Electrical Crimping and Cutting Solution

This versatile electrical tool is engineered for power transmission and distribution tasks, combining crimping and cutting capabilities in one ergonomic design. It features dedicated sections for both insulated and non-insulated wire terminals, ensuring secure and precise connections. Clearly marked wire gauge indicators allow for rapid selection and consistent performance across various electrical maintenance applications.

Technical Capabilities

Supported Wire Gauges (AWG)

| Connection Type | AWG Range |
|-----------------|---------------------|
| Insulated | 22-18, 16-14, 12-10 |
| Non-Insulated | 22-18, 16-14, 12-10 |

Tool Functions

Insulated Crimping, Non-insulated Crimping, Wire Cutting

Design and Ergonomics

Design Highlights

- Ergonomic handle design for extended use
- High-visibility wire gauge markings
- Integrated precision wire cutter
- Balanced grip for enhanced control
