

Electrician Combination Pliers with Insulated Handle

These combination pliers are designed for electricians and feature insulated handles. They are constructed from durable steel and include hardened cutting edges and a gripping zone.

Product Overview

Professional Electrician Combination Pliers

These high-leverage combination pliers are engineered specifically for electrical applications, offering a balance of safety and performance. Featuring durable steel construction, they are built to withstand rigorous daily use in professional environments. The integrated insulated handles provide essential protection, while the hardened cutting edges ensure precise and efficient wire manipulation.
