

# Electrolysis Disinfection Mini Washing Machine

This compact washing machine uses electrolysis disinfection to thoroughly clean clothes. Featuring a rotating impeller, it ensures effective washing action.

## ADDITIONAL IMAGES

## Product Overview

### Advanced Electrolytic Cleaning Technology

This portable mini washing machine features an integrated electrolytic water generator that produces hypochlorous acid during the wash cycle. This process provides enhanced cleaning power, effective sterilization, and deodorization for delicate items. Designed for convenience, it combines a rotating stirring mechanism with advanced disinfection technology in a compact, waterproof unit.

## Technical Specifications

<b>Model Number</b>	LM05
<b>Input Voltage</b>	DC 5V, 1A
<b>Outlet Current</b>	500 mA
<b>Battery Capacity</b>	4000 mAh
<b>Motor Specifications</b>	3.7V 1A

## Performance Metrics

### Performance Metrics

**200 mg/L**

Chlorine Concentration

**99.99 %**

Sterilization Rate

## Design & Features

### Waterproof Rating

IPX7

### Control Interface

- Micro press switch
- RGB LED status indicators

### Charging Method

Magnetic connector with USB adapter

## Operational Modes

### Operating Modes

Mode	Description
Mode 1	Electrolysis only (15 min auto-shutoff)
Mode 2	Electrolysis + Stirring (15 min auto-shutoff)
