

Electronic Ballast for Gas Discharge Lamps

This electronic ballast is designed to start and operate fluorescent and other gas discharge lamps. It features a finned aluminum housing for heat dissipation and includes a power cord for easy connection.

Product Overview

Professional Electronic Ballast

This high-performance electronic ballast is engineered to provide reliable starting and operating conditions for gas discharge and fluorescent lamps. Designed with thermal efficiency in mind, it features a robust finned aluminum housing that ensures optimal heat dissipation during operation. The unit also includes a built-in rotary dimmer, offering users precise control over light output to meet specific application requirements.

Technical Specifications

Unit Weight	1.8 kg
Shipping Weight	15.5 kg

Compliance and Standards

Certifications	cULus, CE, FC, RoHS
----------------	---------------------

Design Features

Housing Material	Finned aluminum
Adjustable Dimming	Yes
