

Electronic Buzzer

This electronic buzzer is designed for generating audible tones or signals. It has a compact rectangular package with through-hole mounting leads.

Product Overview

Compact Electronic Buzzer

This electronic buzzer component is engineered for reliable sound signal generation in a variety of electronic applications. Its compact rectangular design and through-hole mounting leads facilitate easy integration onto printed circuit boards. It serves as a versatile solution for audible feedback systems requiring consistent performance.

Technical Specifications

Model Identifier	102
Mounting Type	Through-hole
Component Category	Audio Component, Ceramic Resonator, Buzzer
