

# Electronic Device Mainboard, 247 x 198mm

This mainboard measures 247mm x 198mm. It is populated with components such as capacitors, resistors, integrated circuits, connectors, and wiring harnesses.

## Overview

### Mainboard Overview

This versatile mainboard is engineered for seamless integration into electronic systems requiring a standardized control architecture. With its precise dimensions of 247mm by 198mm, it is optimized for display applications ranging from 14 to 21 inches. The board includes essential components such as capacitors, integrated circuits, and dedicated audio/video ports to support mono audio output and display control.

## Technical Specifications

### Included Components

- Capacitors
- Resistors
- Integrated circuits
- Connectors
- Wiring harnesses
- AV input ports
- Power supply components

<b>Board Dimensions</b>	247mm x 198mm
<b>Compatible CRT Size</b>	14 inch, 21 inch
<b>Audio Output</b>	Mono
