Product Overview

Versatile Electronic Security Cable

This high-quality electronic security cable is engineered for reliable signal transmission in diverse applications, including audio devices, speaker systems, power, and lighting installations. Designed with durability in mind, the cable features easy-to-strip insulation and is available in multiple conductor materials and colors for specialized needs. Its robust construction ensures consistent performance for professional security and communication systems.

Technical Specifications

Key Features

- Easy to strip and cut
- Standard thickness design
- Customizable gauge and color
- Suitable for audio and power applications

Conductor Material Options

Oxygen-free copper, Tinned copper, CCA, CCS

Insulation Material

Transparent PVC

Logistics & Packaging

Standard Roll Lengths

- 100m/roll
- 200m/roll
- 305m/roll

Packaging Options

Component	Available Options
Inner Packing	Plastic spool, paper drum, wooden drum
Outer Packing	Carton box
