

Electronic System Ventilation Vent SB-45

This 125x118mm ventilation vent is designed for integration into electronic systems, particularly computer monitors. It facilitates efficient airflow to prevent overheating and maintain optimal performance of sensitive components.

Product Overview

Thermal Management Solution

The SB-45 is a specialized ventilation component engineered for effective thermal management in electronic systems, particularly computer monitors. Designed to facilitate consistent airflow, this vent helps prevent overheating and supports the operational longevity of sensitive internal hardware. Its precise construction and durable, heat-resistant materials ensure a reliable fit and long-term performance.
