

Electronic Timer

This electronic timer is designed for industrial automation and control. It features a wide timing range and multiple operating modes.

Product Overview

Industrial Precision Timing

The H3CT-8 is a compact, high-precision electronic timer engineered for demanding industrial automation and control applications. It offers versatile functionality with selectable time units and multiple operating modes, supporting processes like sequential control, delay timing, and interval timing. Designed for reliability, this unit features a clear, intuitive dial for easy time configuration and LED status indicators for real-time monitoring.

Technical Specifications

Supported Operations

- Sequential control
- Delay timing
- Interval timing

Interface Features

Manual Dial • LED Status Indicators

Applications

- Industrial Automation
- Process Control

Selectable Time Units

Seconds, Minutes
