

Electroplated Diamond Grinding Wheel

This electroplated diamond grinding wheel is designed for precision grinding and shaping of hard materials. It features a durable steel core with a uniform coating of high-quality diamond particles for efficient material removal and long lifespan.

Product Overview

Precision Electroplated Diamond Grinding Wheel

This electroplated diamond grinding wheel is engineered for the precision grinding and shaping of hard materials. Featuring a durable steel core coated with high-quality diamond particles, it delivers efficient material removal and an extended operational lifespan. Its robust electroplated construction ensures consistent performance and high wear resistance, making it a reliable choice for professional applications.

Technical Specifications

Application Type

Wet Grinding • Dry Grinding

Construction Features

- Durable steel core
- Uniform high-quality diamond particle coating
- Electroplated construction for wear resistance

Compatible Materials

Stone, Glass, Ceramics, Composites
