

Elevator

An elevator is a lifting platform used to move people or freight between floors. It provides vertical transportation in buildings and other structures.

Product Overview

Energy-Efficient Lighting Solution

This compact fluorescent light bulb (CFL) is designed as a direct, energy-efficient replacement for traditional incandescent bulbs. Featuring a robust multi-tube design, it delivers increased light output while significantly reducing energy consumption. Its standard screw base ensures easy, hassle-free installation across a wide range of residential, commercial, and industrial lighting applications.

Technical Specifications

Bulb Type	Compact Fluorescent Light (CFL)
Design Features	Multi-tube design, Standard screw base, Energy-efficient

Applications

Suitable Environments

- Residential
- Commercial
- Industrial
