

Elevator Lifting Clamp

Specialized lifting clamp designed for elevator installation and maintenance. Features a robust frame with adjustable gripping arms to securely hold elevator components during lifting and positioning.

Overview

Professional Elevator Lifting Clamp

This specialized lifting clamp is engineered specifically for the installation and maintenance of elevator components. It features a robust frame with adjustable gripping arms designed to securely hold materials during lifting and positioning tasks. Built for heavy-duty industrial and construction environments, this tool ensures safe, efficient material handling and balanced load distribution.

Technical Dimensions

Top Structure Height	1600 mm
Lifting Mechanism Width	234 mm
Key Dimensions Reference	Length (L), Gripping Arm Distance (A), Vertical Height (H), Depth (D)
