

Embedded Computer

This embedded computer provides reliable computing for industrial applications. Its compact design ensures durability and efficient performance in demanding environments.

Overview

High-Performance Embedded Computing Solution

This embedded computer system is designed to deliver reliable performance for a variety of professional applications, ranging from office environments to graphic design and multimedia tasks. Featuring a slim bezel design and high-quality LED-backlit display, it provides vibrant visuals and sharp image clarity. The system is engineered for ergonomic comfort with adjustable viewing angles and is built with an emphasis on power efficiency and eco-friendly operation.

Display & Visuals

Display Technology	LED-backlit LCD
Design Features	Slim Bezel, Ergonomic Stand, Tilt Adjustable, Height Adjustable

Connectivity

Supported Interfaces

- HDMI
- DisplayPort
- VGA

Performance & Efficiency
