

Emergency Escape Hammer with Seatbelt Cutter

This emergency tool is designed for vehicle safety. It features dual hardened steel points for breaking windows and a razor-sharp blade for cutting seatbelts, facilitating rapid escape.

Product Overview

Emergency Escape Tool

This emergency escape hammer is a critical safety tool designed for rapid vehicle extrication. It features dual hardened steel points capable of breaking glass quickly and efficiently in high-pressure situations. Additionally, an integrated, recessed razor-sharp blade allows for the swift cutting of seatbelts, ensuring occupants can escape or be rescued without delay.

Key Features
