

Emergency Inflatable SOLAS Liferaft

This inflatable liferaft is designed for emergency life-saving at sea. It complies with SOLAS (74/96) and MSSC.81(70) standards and can be stored at a max height of 18~36m.

Product Overview

Safety at Sea

This emergency inflatable liferaft is engineered specifically for marine safety, ensuring compliance with strict SOLAS regulations. Designed for rapid deployment, it features robust buoyancy chambers and a weather-resistant canopy to provide immediate protection and shelter during vessel abandonment. It is an essential life-saving solution for professional maritime operations worldwide.

Technical Standards

Certifications

SOLAS, CS-0098-1

Key Features

Core Equipment

- Inflatable buoyancy chambers
- Protective canopy
- Integrated inflation system
- Internal survival equipment storage
- Boarding ramp system

Operational Details

Primary Purpose

Temporary shelter and flotation during emergency vessel abandonment
