

EN877 Standard Cast Iron Drainage Pipe

These cast iron pipes meet the EN877 standard for high quality and performance. Featuring a smooth inner surface, they facilitate efficient flow and prevent blockages in plumbing and construction projects.

Product Overview

EN877 Cast Iron Drainage System

These EN877 standard cast iron pipes are engineered for superior performance in professional drainage applications. Designed with a smooth inner surface, they facilitate efficient flow while effectively preventing blockages. Their robust construction ensures exceptional durability and long-term resistance to corrosion, making them a reliable choice for complex plumbing and construction projects.

Technical Standards

Compliance Standard

EN877

Primary Material

Cast Iron

Performance Features

Key Benefits

- Corrosion resistant
- High durability
- Smooth inner surface for efficient flow
- Interchangeable with standard drainage components

Primary Usage

Drainage, Plumbing, Construction
