

Enclosed Abrasive Sandblasting Cabinet

This enclosed sandblasting cabinet is designed for a variety of surface preparation and cleaning applications. Its enclosed design minimizes dust and media leakage, promoting a cleaner workspace.

Product Overview

Industrial Sandblasting Efficiency

The SBC100B Sandblasting Cabinet is a robust, heavy-duty solution designed for demanding surface preparation tasks. Its enclosed design ensures a clean, dust-free workspace while allowing for precise removal of rust, paint, and scale from various metal surfaces. Featuring integrated safety gloves and a wide viewing window, this unit provides professional-grade control and consistent results for industrial and workshop applications.

Construction and Design

Build Material	Heavy-duty steel
Unit Design	Enclosed, Dust-minimized

Operational Features

Integrated Safety

- Integrated operator gloves
- Large viewing window
- Warning labels for operational safety

Primary Applications	Rust removal, Paint stripping, Scale removal, Glass etching
