

Enclosed Diesel Generator Set

This enclosed diesel generator set is designed for reliable power generation. It features a robust enclosure for noise reduction and weather protection, along with a control panel for monitoring and operation.

Overview

Reliable Enclosed Power Generation

This enclosed diesel generator set is engineered for consistent and reliable power delivery, suitable for both backup and prime power applications. The unit features a robust, weather-resistant enclosure that provides effective noise reduction and protection against the elements. Equipped with an advanced auto-start control system and integrated safety components, this generator is designed for seamless operation and maintenance.

Technical Specifications

Cooling System	Water cooled
Frequency	50 Hz
Voltage Ratings	230 / 400V
Fuel Tank Runtime	8 hours

Components

Included Components

- Radiator with engine-driven fan
- Auto-start control panel
- Circuit breaker
- Anti-vibration mountings
- Industrial silencer with flexible connections
- Base fuel tank

Documentation and Support

Included Documentation	Test Report, Technical Drawings, User Manuals
Included Accessories	Standard tool kit
