

Energy Efficient Compact Refrigerator

This refrigerator features first-class energy efficiency, achieving optimal system matching to minimize energy waste and save electricity. It is equipped with a high-efficiency, environmentally friendly fluorine-free compressor using R600a refrigerant, ensuring safety and pollution-free operation.

Product Overview

Energy-Efficient Performance

This compact refrigerator is engineered for maximum energy efficiency, featuring a high-density, microcellular foam insulation layer that eliminates heat leakage. It utilizes an environmentally friendly R600a refrigerant, ensuring a sustainable and pollution-free cooling operation. Designed for reliability, the unit includes a wide-voltage range capability, making it highly effective even in regions with unstable power supply.

Technical Specifications

Refrigerant	R600a (Fluorine-free)
Voltage Design	Wide voltage range compatibility
Insulation Type	High-density microcellular foaming

Design & Features

Internal Organization

- Adjustable shelves
- Transparent storage drawers
- Multi-airbag detachable door seals

Available Colors

Emerald Green, Gem Blue

Models

Model Table

Series	Model Numbers
MG Series	BCD-179, BCD-189, BCD-199, BCD-219
MB Series	BCD-179, BCD-189, BCD-199, BCD-219
