

Engine Piston Ring Set

These piston rings are engineered for optimal engine sealing and reduced friction. The rings withstand extreme temperatures and pressures, ensuring reliable performance and extended engine life.

Product Overview

High-Performance Engine Piston Ring Set

This precision-engineered piston ring set is designed to ensure optimal engine sealing and reduced friction. Engineered to withstand extreme temperatures and pressures, these rings promote reliable performance and extended engine life. With a precision-machined profile, they offer superior oil control and reduced blow-by, contributing directly to improved fuel efficiency and lower emissions.

Compatibility

Compatible Vehicle	SUZUKI JIMNY
Engine Configuration	4 cylinders, F10A Engine Mode

Technical Dimensions

Ring Sizes

1.5 mm 1st Ring	1.5 mm 2nd Ring	2.8 mm Oil Ring
---------------------------	---------------------------	---------------------------

Piston Diameter	65.5 mm
-----------------	---------

Material Composition

Material Specifications

Component	Material
1st Ring	Steel
2nd Ring	K1
Oil Ring	RIK

Identification
