Product Overview

High-Performance Engine Cooling

This engine radiator is specifically designed for the Hyundai Elantra 1.8L, providing efficient cooling to prevent engine overheating. Constructed with durable materials, it is engineered to meet or exceed original equipment specifications for reliable performance. Its direct-fit design ensures straightforward installation, helping to maintain optimal engine temperature and longevity.

Compatibility & Fitment

Vehicle Model	Hyundai Elantra 1.8L
OEM Part Number	25310-3X101, 3X101

Technical Features

Key Performance Features

- Superior heat dissipation
- Direct fit installation
- Durable construction for long-lasting reliability
- Optimal engine temperature regulation
