

Environmentally Compliant Synthetic Paper

This synthetic paper is engineered to comply with EU environmental protection standards. It provides a sustainable and durable alternative to conventional paper, suitable for various packaging applications.

Product Overview

Sustainable Synthetic Solution

This environmentally compliant synthetic paper is engineered to meet stringent EU environmental protection standards. It serves as a high-performance, sustainable alternative to traditional paper products, offering superior durability and water resistance. It is specifically designed for applications where compliance with international environmental regulations is a critical requirement.

Compliance and Standards

Environmental Compliance

EU Compliant, Sustainable, Environmentally Friendly

Technical Features

Key Performance Indicators

100 %

Water Resistance

Application Fields

Target Sectors

- Paper Mill Engineering
- Commercial Printing
- Regulatory Compliant Projects
