Product Overview

High-Performance Fuel Delivery

This EPDM rubber fuel hose is engineered for demanding automotive applications, providing reliable performance in fuel systems including lines, pumps, and filters. Constructed from high-quality EPDM rubber, it offers superior resistance to heat, oil, and various automotive fluids. Its reinforced design ensures both strength and flexibility, making it an ideal choice for cars, trucks, and other vehicles requiring dependable fuel transport.

Technical Specifications

Key Features

- Reinforced construction
- Heat resistant
- Fuel permeation resistant
- Weathering resistant
- Flexible design

Application Areas

Fuel Lines • Fuel Pumps • Fuel Filters • Automotive Systems

Material	EPDM Rubber
Compatible Fluids	Gasoline, Diesel, Oil
