

Epoxy Injection Pump with Adjustable Ratio

This epoxy injection pump features adjustable speed and supports mixing ratios of 4:1, 3:1, 2:1, and 1:1. It is designed for consistent and reliable epoxy injection for various construction and industrial needs.

Product Overview

Professional Injection System

This dual-component epoxy injection pump offers versatile ratio regulation, supporting 4:1, 3:1, 2:1, and 1:1 configurations to meet diverse construction and waterproofing needs. Designed for efficiency, it features a heavy-duty, lightweight construction with dual 1200W motors for reliable daily operation. The system includes essential accessories like pressure gauges, hoppers, and a hose set, making it a comprehensive, easy-to-maintain solution for professional injection tasks.

Performance & Power

Motor Power

1200 W

Power per Drill

2 units

Number of Drills

Voltage Range

110V - 240V

Frequency

50/60 Hz

Technical Specifications

The complete injection pump system, featuring dual hoppers and adjustable ratio controls for versatile application.

System Modes

Dual Component • Single Component

Included Accessories

- Pressure Gauges
- Hoppers
- Hose Set (Mechanical Packer Version)

Design Highlights

Compact • Lightweight • Heavy Duty • Adjustable Speed

Supported Ratios

1:1, 2:1, 3:1, 4:1
