

# Ergonomic Vertical Optical Mouse

This ergonomic vertical optical mouse is designed to reduce wrist strain and improve comfort. It features a high-precision optical sensor and adjustable DPI settings for customized sensitivity.

## Product Overview

### Ergonomic Design for Professional Use

This ergonomic vertical optical mouse is specifically engineered to reduce wrist strain and enhance comfort during extended periods of use. Its unique vertical orientation promotes a more neutral wrist posture, which helps minimize the risk of carpal tunnel syndrome. Designed with a contoured shape that fits the natural curve of the hand, it offers a seamless and comfortable user experience.

## Technical Specifications

Sensor Technology	High-precision optical sensor
