Product Overview

Modular European Power Socket

This modular power socket is designed specifically for European market standards, offering reliable power transmission for residential, commercial, and industrial electrical installations. Engineered for 35mm DIN rail mounting, it integrates seamlessly into distribution boards and control panels. With a robust design supporting up to 25A and a compact 45mm width, it provides a flexible solution for diverse electrical setups.

Technical Specifications

Technical parameters including rated current, frequency, and installation dimensions.

Rated Current Options	10A, 16A, 25A
Rated Insulation Voltage (Ui)	500 V
Operating Frequency	50 or 60 Hz
Connection Capacity	d6m ²
Electrical Life	5000 cycles

Installation & Environment

Protection Class	IP20
Mounting	35mm DIN rail
Module Width	45 mm
Ambient Temperature Range	-5°C to +40°C
