

Evaporative Air Cooler for Commercial Spaces

This evaporative air cooler is designed for cooling large commercial and industrial spaces. It utilizes evaporative cooling to reduce air temperature, offering an energy-efficient cooling solution.

ADDITIONAL IMAGES

Product Overview

Efficient Cooling for Large Spaces

The KD18A series evaporative air cooler is engineered for industrial and commercial environments, including factories, schools, and supermarkets. By utilizing the natural principle of evaporative cooling, this system significantly reduces air temperature while maintaining high energy efficiency. It offers a sustainable, cost-effective alternative to traditional air conditioning, specifically designed for large spaces that require consistent and reliable climate control.

Key Features

Operational Features

- Adjustable fan speeds
- High-capacity water tank
- Water level indicator
- Easy maintenance access
- User-friendly controls

Core Advantages

Energy Efficient, Environmentally Friendly, High Airflow Capacity, Durable Construction, Low Maintenance

Performance Metrics

Performance Highlights

18000 m³/h
Airflow Capacity
