

Evaporative Air Cooler with Remote Control

This evaporative air cooler delivers efficient cooling through water evaporation. It features a multi-speed fan, adjustable louvers, and a remote control for convenient operation.

Product Overview

Efficient Cooling Solution

This evaporative air cooler offers a practical solution for maintaining comfortable temperatures in homes, offices, and small spaces. Utilizing water evaporation technology, it provides efficient cooling while maintaining a compact and portable design. With user-friendly features like remote control operation, adjustable louvers, and easy-to-maintain filters, it is designed for convenience and versatility.

Key Features

Core Features

- Evaporative cooling technology
- Multi-speed fan settings
- Adjustable airflow louvers
- Remote control operation
- Water level indicator
- Washable air filter

Design & Portability

Portability

Compact Design, Caster Wheels, Portable

Maintenance

Maintenance

Features a washable filter for easy cleaning and maintenance.
