

Evaporative Portable Air Cooler with Adjustable Fan Speeds

This moveable air cooler provides efficient and convenient cooling. It features a large water tank for extended use and multiple fan speeds for customized comfort.

Overview

High-Efficiency Evaporative Cooling

This high-capacity evaporative air cooler is designed for efficient climate control in medium-to-large spaces. Featuring a robust 50L water tank and advanced cellulose cooling pad technology, it delivers consistent, refreshing airflow for extended periods. It offers a cost-effective and eco-friendly cooling solution suitable for both commercial and residential environments.

Performance & Capacity

Key Performance Metrics

8000 CBM/Hour

Airflow Volume

50 L

Water Tank Capacity

50 sqm

Max Usage Area

Power Consumption

200 W

Voltage Rating

220-240V/50HZ

Features & Control

Included Accessories

- 2 x Ice-crystal boxes
- Cellulose cooling pad system

Key Benefits

Eco-friendly • Low noise

Control & Operation

Remote Controller, Timer, PC Board, Wide Angle Air Supply

Logistics & Dimensions
