Product Overview

Heavy-Duty Excavator Bucket

This heavy-duty, reinforced steel excavator bucket is engineered for demanding construction and excavation environments. It features an excellent structural design with full protection for base edges, ensuring longevity and durability in tough soil conditions. Designed for efficiency, it offers fast installation and removal, along with improved penetration capabilities for high-productivity material handling.

Key Features

Design Highlights

- Reinforced steel construction
- Full base edge protection
- Improved penetration geometry
- Fast installation and removal system
