

# Excavator Bucket Tooth 1U3352 for J350 Series

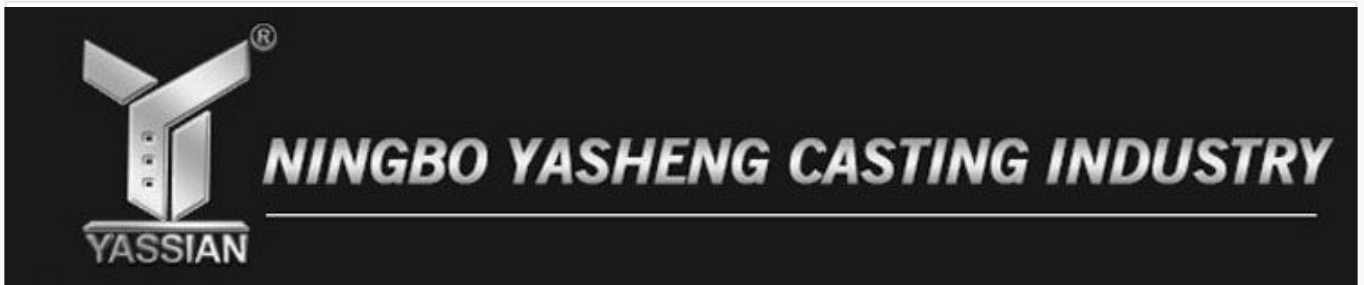

This bucket tooth 1U3352 is designed for CAT excavator J350 series. It provides enhanced digging performance and extended wear life.

## ADDITIONAL IMAGES

## Product Overview

Precision-cast 1U3352 bucket tooth designed for high-abrasion environments.

### High-Performance J350 Series Bucket Tooth

The 1U3352 bucket tooth is engineered for J350 series excavators, providing exceptional digging performance and extended wear life in demanding construction environments. Manufactured using precision casting and alloy steel, it features high impact toughness and a hardness rating of HRC 47-52. This component is designed to meet or exceed OEM standards, ensuring a precise fit for heavy-duty excavation, trenching, and material handling.

## Technical Specifications

### Manufacturing Process

- Precision casting
- CNC drilling for accurate bolt hole alignment
- Automatic electrostatic spray painting

<b>Material</b>	Alloy steel
<b>Hardness</b>	HRC 47-52
<b>Net Weight</b>	6.2 kg

## Compatibility & Application

Compatible Machines	Caterpillar, Komatsu, JCB, Hyundai, Doosan
Series Compatibility	J350 Series

## Logistics & Business

### Order & Delivery Metrics

<b>10 pc</b> Minimum Order	<b>30 days</b> Delivery Lead Time	<b>24 months</b> Warranty Period
-------------------------------	--------------------------------------	-------------------------------------

### Loading Ports

- Ningbo
- Shanghai
- Guangzhou
- Yiwu

Packaging	Plywood case
-----------	--------------

## Quality & Service

### Certifications

ISO9001: 2015 • SGS

### Service & Support

- Free replacement for abnormal wear within warranty
- Full technical support
- Market exploration assistance
- Global export experience to 55+ countries
