

Excavator Grapple Saw Attachment

This attachment integrates a grapple and saw for efficient forestry and landscaping tasks. It is designed for mounting on excavators and other machinery, enhancing productivity in tree felling and material handling.

Product Overview

High-Performance Grapple Saw

The WYJ-100W grapple saw is a robust and versatile attachment specifically engineered for demanding forestry and landscaping applications. Constructed from high-strength steel, it ensures exceptional durability and reliable performance in rigorous working environments. The unit features integrated hydraulic saw and grapple functions, allowing for precise cutting and secure material handling, significantly enhancing productivity for tree felling and pruning tasks.

Technical Specifications

Working Pressure

21 MPa

Min Pressure

25 MPa

Max Pressure

Model	WYJ-100W
Weight	656 kg
Compatible Excavator Size	12-20 tons
Clamping and Cutting Range	135 to 520 mm

Drive and Mechanics

Rotary Drive System

- Vertical straight teeth
- Hydraulic brake
- 360° rotation

Clamp Drive Type	Bunching grapple, Single cylinder and Double link
-------------------------	---

Components

Saw Motor Model	Parker F11-019-SB-CS-K-000-MUVL-BO
Chain Model	NF25-80NL
