

Excavator Side Cutter Shroud

The side cutter shroud, also known as a side protector or wing shroud, is designed to protect the sides of heavy machinery. Constructed from high-strength steel, it provides exceptional resistance to abrasion, impact, and wear.

Product Overview

Heavy-Duty Side Protection

This high-strength side cutter, also referred to as a side protector, wing shroud, or vertical shroud, is engineered for demanding earthmoving and construction environments. Constructed from robust, wear-resistant steel, the component is designed to shield the sides of excavator and loader buckets from intense abrasion and impact. Its reinforced structure and precise mounting design ensure reliable performance, helping to extend the service life of heavy machinery buckets.

Technical Specifications

Key Features

High-Strength Steel • Abrasion Resistant • Impact Resistant • Reinforced Structure

Compatible Component Types

Side Cutter, Side Protector, Wing Shroud, Vertical Shroud

Compatibility

Compatible Equipment

- Excavators
- Loaders
- Bulldozers
- Motor Graders
- Electric Shovels
