

Excavator Tooth Bolt-On Adapter

This bolt-on adapter facilitates the attachment of teeth to Caterpillar machinery. It is engineered to withstand heavy-duty conditions, providing a secure and reliable connection.

Overview

Heavy-Duty Bolt-On Adapter

This bolt-on adapter is precision-engineered to facilitate a secure and reliable connection between excavator teeth and machinery. Constructed from high-strength materials, it is specifically designed to withstand the demanding conditions of heavy-duty applications, including extreme wear, impact, and abrasion. This component ensures optimal performance and longevity for earthmoving equipment in challenging work environments.

Technical Specifications

Application Suitability

- Heavy-duty earthmoving
- High-impact environments
- High-abrasion conditions

Compatible Part Numbers

8E2184, 9W6207

Mounting Type

Bolt-on

Key Features

Material Benefits

High-Strength Steel • Wear Resistant • Impact Resistant • Abrasion Resistant
