Overview

Premium Excavator Top Carrier Roller

This top carrier roller is precision-engineered to provide essential support for the track chain under all operating conditions. Designed with versatility in mind, it is available in multiple flange configurations—including single, middle, and no-flange options—to ensure a perfect fit for your specific undercarriage requirements. Equipped with high-quality bearings or bushings, this component is built to deliver superior performance, extended service life, and reduced maintenance in demanding construction environments.
