

Experimental Analytical Instrument with Lantern Design

This is an experimental analytical instrument featuring a vintage-style outdoor wall lantern design. The lantern has a multi-faceted clear glass enclosure, showcasing an internal bulb.

Product Overview

Distinctive Experimental Instrument

This unique experimental analytical instrument combines scientific utility with a striking vintage-style outdoor wall lantern aesthetic. Featuring a multi-faceted clear glass enclosure and a robust dark-finish metal frame, it is designed for secure wall mounting. The design integrates a decorative top finial and a curved arm, making it a visually compelling choice for specialized laboratory or display environments.

Design & Construction

Design Style	Vintage-style lantern
Mounting Type	Wall mount
Finish	Dark metal finish
Enclosure Material	Multi-faceted clear glass
Key Features	Wall-mounted, Vintage aesthetic, Decorative finial, Curved mounting arm
