

Extendable Fruit Picker Pruning Shear

The extendable fruit picker pruning shear features a lightweight aluminum pole for reaching high branches. It is available in lengths of 1000mm, 1500mm, and 2400mm for efficient and safe operation.

Product Overview

Professional Fruit Harvesting Solution

This extendable fruit picker and pruning shear is engineered for efficient orchard management and garden maintenance. Featuring a lightweight aluminum pole design, it allows operators to safely reach high branches without the need for ladders. The tool is available in various lengths to suit different harvesting requirements, ensuring precision and ease of use for professional applications.

Technical Specifications

Construction Material	Aluminum
Available Lengths	1000mm, 1500mm, 2400mm
Patent Number	CN200520027055.8

Model Comparison
