

Feeder System Cutter Base

This cutter base is designed for use in Hitachi feeder systems. It provides a direct replacement for worn or damaged components, ensuring precise alignment and smooth operation.

Product Overview

Precision Cutter Base Component

This precision-engineered cutter base is designed specifically for automated feeder systems, ensuring reliable and consistent cutting performance. Constructed from high-quality materials, it serves as a direct, durable replacement for worn or damaged components. Meticulously manufactured to meet stringent quality standards, this part guarantees precise alignment and smooth operation to help minimize downtime and maximize production efficiency.

Technical Details

Part Number	0988A81B
Component Name	CUTTER_BASE(S)

Logistics & Service

Return & Replacement Policy

Returns or replacements are accepted if the product is in original condition (no scratches, wear, or use) and packaging is complete. Requests must be made within 3 days of receipt. Buyers are responsible for return shipping costs unless the return is due to non-conformity with required conditions.

Shipping Lead Time	1-7 days
Supported Carriers	EMS, UPS, DHL, TNT, Hong Kong Post
Payment Terms	100% T/T before shipment
