

Ferrule Secured Wire Rope Sling

These high-strength slings feature swaged aluminum or steel ferrules for secure termination. Constructed from durable steel wire rope, they offer excellent abrasion resistance and load-bearing capacity.

Product Overview

High-Strength Rigging Solution

These ferrule-secured wire rope slings are engineered for heavy-duty lifting and rigging applications across construction, manufacturing, and marine sectors. Constructed from durable steel wire rope, they feature swaged aluminum or steel ferrules that provide a reliable, secure termination for enhanced safety. Designed to withstand demanding environments, these slings offer excellent abrasion resistance and consistent performance across a wide range of temperatures and weather conditions.

Technical Specifications

Termination Method	Swaged ferrule (aluminum or steel)
Material	Steel wire rope
Key Features	High-strength, Abrasion-resistant, Weather-resistant, Secure termination

Applications

Suitable Industries

- Construction
- Manufacturing
- Marine
