Product Overview

Professional Respiratory Protection

This FFP2 valved filtering half-mask is designed to protect users against solid and liquid particles of average toxicity. It features a cup-shaped design with an integrated nose clip and foam reinforcement for a secure and comfortable fit during extended wear. With an efficiency rating of 94%, it is an essential choice for industrial environments involving sanding, drilling, and processing of various materials.

Standards & Compliance

Certifications

Filtration Efficiency

Construction Materials

- Non-woven Fabric
- Melt Blown Filter
- Needle-punched Cotton

Usability & Maintenance

Usage Guidelines

- Do not use for more than 8 hours
- Single-use only (disposable)
- Store in a cool place
- Use only within defined scope

Applications

Recommended Uses

- Sanding of soft wood
- Composite materials
- Rust removal
- Putty and plaster work
- Plastic cutting and deburring
- Metal grinding and drilling
