

Fiber Optic Distribution Box

This outdoor fiber optic distribution box is built to protect and manage fiber optic connections in harsh environments. It features a rugged, weatherproof enclosure with multiple ports and internal components for distributing optical signals.

Product Overview

Rugged Connectivity Solution

This outdoor fiber optic distribution box is engineered to protect and manage fiber optic connections in harsh environmental conditions. It features a durable, weatherproof enclosure designed to house distribution panels, fiber optic splitters, and essential components for optical signal distribution. Built for reliability, this unit ensures seamless performance and simplified installation in demanding network infrastructure applications.

Key Features

Core Capabilities

Weatherproof Enclosure, Outdoor Rated, Fiber Management, Signal Distribution

Technical Specifications

Internal Components

- Distribution Panel
- Fiber Optic Splitters
