

Fiberglass Handle Machinist Hammer with Rubber Grip

This machinist hammer is equipped with a fiberglass handle and a rubber grip. It is designed for precision work and heavy-duty applications, providing optimal balance and control.

Product Overview

Professional Machinist Hammer

This machinist hammer is designed for both precision tasks and heavy-duty applications. Featuring a durable fiberglass handle, it provides superior strength and effective shock absorption during use. The ergonomic rubber grip ensures a secure, comfortable hold, significantly reducing hand fatigue during extended professional projects.

Construction & Design

Handle Material	Fiberglass
Grip Material	Rubber

Key Features

Recommended Applications

- Precision metalwork
- Heavy-duty construction
- General workshop applications

Performance Attributes	Shock Absorbing, Ergonomic Grip, High Durability, Precision Balanced
