Product Overview

Comprehensive Figured Glass Production Solution

This advanced manufacturing line is engineered for the continuous production of high-quality figured glass. Designed for versatility, the system supports a wide range of production capacities and fuel sources, ensuring adaptability to various industrial requirements. The complete package includes end-to-end services, from initial facility design to equipment installation, commissioning, and final trial runs.

Technical Specifications

Production Capacity

60 TPD

Minimum Capacity

250 TPD

Maximum Capacity

Net Ribbon Width

1220 mm

Minimum Width

2440 mm

Maximum Width

Compatible Fuel Sources

Natural Gas, Heavy Oil, Petroleum Coke, Coal

Service & Support

Included Services

- Facility Design
- Equipment Supply
- Equipment Installation
- Commissioning
- Trial Run

Operational Experience

Track Record

Successfully completed more than a dozen figured glass production lines for both domestic and international clients.
