

Fire Suppression Diesel Engine

This fire suppression diesel engine is engineered for high-performance fire suppression systems. Its complex array of pipes, valves, and gauges indicates sophisticated fluid management capabilities.

Overview

High-Performance Fire Suppression Engine

This diesel engine is engineered specifically for demanding fire suppression applications, adhering to rigorous international design standards including NFPA20, UL, and EN12845. Built for reliability and stability, it features a robust frame and sophisticated control systems to ensure consistent performance in critical safety environments. With a versatile power range and speed configuration, it is an essential component for professional fire protection infrastructure.

Technical Specifications

Power Output Range

51 HP

Minimum Power

1207 HP

Maximum Power

Design Standards	NFPA20, UL, EN12845
Speed Range	1500 rpm
Maximum Speed	2980 rpm
