

Flanged 90-Degree Industrial Connector

This blue-coated industrial connector features a 90-degree bend and flanged ends. It is designed for secure and leak-proof connections in fluid or gas handling systems.

Product Overview

Industrial-Grade 90-Degree Flanged Connector

This flanged 90-degree industrial connector is engineered for high-performance fluid and gas handling systems. Its robust construction ensures reliable, leak-proof connections, while the durable blue coating provides excellent resistance to corrosion in demanding environments. This versatile fitting is specifically designed to meet the rigorous demands of professional-grade machinery, including spraying and spreading equipment.

Technical Specifications

Configuration	90-degree elbow
Connection Type	Flanged ends with bolt holes
Surface Coating	Blue anti-corrosion finish

Key Features

Key Benefits

Corrosion Resistant • High-Pressure Integrity • Industrial Grade

Suitable Applications	Spraying Machinery, Spreading Equipment, Fluid Handling, Gas Handling
