

Flanged Gate Valve, 300 lb

This API gate valve is a flanged gate valve designed for 300lb pressure. It features a handwheel for manual operation and flanged connections for easy installation in piping systems.

Product Overview

Industrial Flanged Gate Valve

This API-compliant gate valve is engineered for high-performance flow control in demanding industrial environments. Featuring robust cast steel construction and a 300 lb pressure rating, it ensures reliable shutoff and efficient regulation. The design incorporates standard flanged connections for seamless integration into existing piping systems.

Technical Specifications

Pressure Rating	300 lb
Body Material	WCB (Cast Steel)
Connection Type	Flanged
Valve Type	Gate Valve

Compliance & Standards

Compliance Standards	API
