

Flat Cutter Rock Drilling Tools

Flat cutter tools are designed for rock drilling applications. These robust tools deliver optimal performance in demanding mining and construction environments.

Product Overview

High-Performance Rock Drilling Solutions

These flat cutter rock drilling tools are engineered for high efficiency in demanding mining and construction environments. Built for durability and extended service life, they feature precision-engineered cutting surfaces designed to deliver consistent, reliable performance across various rock drilling operations. This robust construction ensures optimal results even in challenging geological conditions.

Technical Specifications

Available Models

- HQFZ65
- HQFZ70
- HQFZ80

Component Types	Flat Cutter Teeth, Holder
Compatible Holder	HQ73
