

Flat Evaporator Plate for Electronics Cooling

The WJ-E703 series evaporator is designed for efficient heat transfer and cooling applications. It features a flat, rectangular form factor with evenly spaced channels for optimal refrigerant flow.

Product Overview

High-Efficiency Cooling Solution

The WJ-E703 series evaporator is engineered for superior heat transfer in electronics cooling applications. Featuring a flat, rectangular form factor with precision-engineered channels, it ensures optimal refrigerant flow and stable operating temperatures. Its lightweight design and high thermal conductivity make it an ideal choice for integrating reliable cooling into sensitive IT and consumer electronics systems.

Technical Specifications

Model Series	WJ-E703
Form Factor	Flat, rectangular plate
Key Features	High Thermal Conductivity, Lightweight Design, Optimized Refrigerant Flow, Durable Construction

Applications

Compatible Industries

- Consumer Electronics
- IT Hardware
- General Electronics Cooling
